Ahmed Hinedy

Frontend Software Engineer

+201020790221 - ahmedhinedy@gmail.com - github.com/hinedy - hinedy.vercel.app - linkedin.com/in/ahmedhinedy

Skills

Frontend & Tools: React.js · Next.js · TypeScript · Redux Toolkit · Zustand · React Query · Material-UI (MUI) · Tailwind CSS · shadcn/ui · Framer Motion · REST/GraphQL · WebSocket (SignalR, Socket.IO) · Zod · Figma
Performance & Quality: Lighthouse · React Testing Library · Jest · Accessibility (WCAG) · React Scan
Build & Deployment: Vercel · Vite · Docker · CI/CD
Workflow & Leadership: Git · Agile/Scrum · Jira · Bitbucket · Technical Documentation · Code Reviews · Architecture Planning · Mentoring Junior Developers

Experience

Frontend Software Engineer nWeave | Alexandria, Egypt | *July 2023 – Present*

- Led frontend development for healthcare platforms, owning features from ideation to deployment, managing feature prioritization while establishing code quality standards and architectural patterns that enhanced code maintainability and team efficiency.
- Reduced production bundle size by 50% and improved page load speed by 28% through code-splitting, on-demand dependency loading, and strategic dependency optimization that directly improved user retention metrics.
- Built reusable components and custom hooks improving UI consistency and accelerating feature development.
- Partnered with Laravel and .NET backend teams to optimize API integration and data flow.

Frontend Developer (Freelance) | *April 2023 – Present*

- Built the frontend foundation for a B2B marketplace MVP with secure authentication, role-based dashboards, admin verification, and scalable discovery flows.
- Improved existing codebases through targeted refactoring and architectural cleanup, strengthening performance, structure, and long-term maintainability.
- Collaborated with international, cross-functional teams, ensuring clear communication, technical alignment, and frictionless project execution across different time zones and cultures.

Projects

MedX *medxsvc.com* | React, Zustand, React Hook Form, SignalR, ASP.NET Core

- Architected a healthcare platform streamlining provider orders, and payments while stabilizing legacy codebase to meet critical deadlines.
- Designed and implemented a conditional logic-driven form engine with schema-based validation, reducing service request processing time and minimizing user input errors.
- Integrated real-time notification system with SignalR, enabling instant updates for service authorizations and order status changes.
- Designed comprehensive role-based access controls (RBAC) ensuring PHI data security and HIPAA-aligned access controls across 5 user types.

Revixir | Next.js, React, TypeScript, Zustand, Zod, React Hook Form, Laravel

- Developed a centralized provider credentialing system that provides healthcare organizations with a standardized, streamlined credentialing process, enhancing operational efficiency and reducing administrative overhead.
- Engineered a secure multi-tenant authentication system, implementing dynamic token rotation, and subdomain isolation via Next.js middleware and Axios interceptors.
- Optimized application performance with Next.js server components and server-side rendering, reducing load times and improving scalability.

Certifications

- **Harvard CS50x: Introduction to Computer Science** – *edx*
- **The Frontend Career Path** - *Scrimba*
- **Responsive Web Design** - *freeCodeCamp*
- **JavaScript Algorithms and Data Structures** - *freeCodeCamp*

Education

B.Sc. Mechanical Engineering Alexandria *University* | *2016 – 2021*
